IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED

Eye: Causes moderate eye irritation.

Skin: Brief contact causes moderate skin irritation with local redness. Prolonged skin contact is unlikely to result in absorption of harmful amounts. Has caused allergic skin reactions in humans.

Inhalation: At room temperature, exposure to vapor is minimal due to low volatility. Vapor from heated material, mist or aerosols may cause respiratory irritation.

Ingestion: Low toxicity if swallowed. Harmful effects primarily due to the alkaline pH.

Chronic Health Hazard: This product contains no listed carcinogens according to IARC, ACGIH, NTP and/or OSHA in concentrations of 0.1 percent or greater.

INDICATION OF IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENTS NEEDED

Note to Physicians: Symptoms may not appear immediately. Corticosteroid cream has been effective in treating skin irritation.

Specific Treatments: No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. In case of accident or if you feel unwell, seek medical advice immediately (provide label or SDS).
