

PRODUCT BULLETIN

When it comes to MVRAs there's been predominately four products included in most specifications here on the West Coast; we've had first-hand experience with three of them. Today, a whole new generation arrives - **Concure Admixture by Durability Consultants**. The fourth, and longest selling moisture/vapor reducing admixture in the United States...

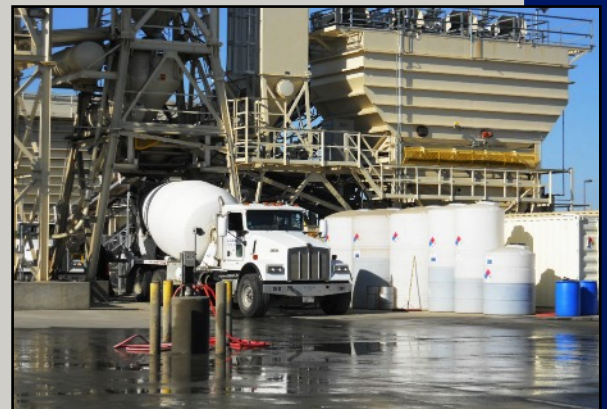

DC and Jim Kaylor are pleased to be bringing a whole new approach to the MVRA marketplace on the West Coast:

- Local (Sun Valley, CA.) At least 15 275-gallon totes on site at all times,
- A consistent price; always,
- Custom de-cantering to exactly what you need on a job by job basis,
- 24-Hour Rush Delivery; this isn't a "dare" my ready mix friends!,
- Quick document/warranty close-out for all your contractor/customers; no testing, no workbooks. Lifetime of the Concrete Warranty.

We are in our 19th year here servicing and enjoying tremendous success by a wide range of discerning architects/specifiers, general contractors (a whole lot up in the Central Valley), concrete subcontractors, elite flooring installers (who know they score by eliminating all moisture testing!), and my life-long friends at all the ready-mix producers up and down the state. **Concure Admix** will be the last port-of-call folks. MVRA my way. Done right...Jim Kaylor
