

Specialty Products Group (SPG) has put forth the opportunity for valued and loyal ready mix producers to utilize our state-of-the-art High Volume Dosing/Pumping systems. We have installed and overseen the installation of numerous custom systems throughout North America.

Our systems include;

- High Volume 1-inch nylon lined transfer pumps (access to 90 psi +/- air),
- High impact base plates (non tip over design) on four independent rubberized legs for quiet, stable operation,
- 1.5" (outer circumference) reinforced lines stay flexible and impervious to UV, stable lines,
- All nylon "Banjo" type fittings with quarter valves at input and output to eliminate spillage when changing out totes,
- When used as stand-alone, we supply the Badger Admix 151 meter; both auto and manual operation, four wire, 110-volt operation,
- Ultimately, "hard wired" directly into your permanent panel/dosing system provides 10 ounces per pulse, flawless operation. We will pay for a licensed electrician to make the connections.

And if you're not ready for a full blown, permanent system, we have our famous and reliable portable units, complete with buildable "candy cane" wand.... Air & 110-volt power is your only requirement.
