To all Specifiers & Users –

RE: ARISFOR; PAST, PRESENT & FUTURE

Arisfor is the state-of-the-art modified cementitious mortar material designed to be a beautiful, long-lasting surface in various colors and textures. Whether it be in vertical wall coatings, or as a horizontal surface overlay/repair material, the Arisfor mortar is synonymous with unmatched quality; both product, performance and installation.

Arisfor started from the genius of the late Roy Johnson, under the trade name Encap Systems Inc. The company and systems were sold to Forta Corporation, and initially was called Forta Kote. After some negotiations around trademark infringement, Forta renamed the product Arisfor.

Today, you may see specifications calling out Encap, Forta Kote, and of course Arisfor. Rest assured, this is all the same formula, manufacturer, and meticulous focus on detail as first created by Roy Johnson.

Thank you in advance for your support and patronage of Arisfor and all the products and services it represents.

Respectfully,

A handwritten signature in blue ink that reads "Jim Kaylor".
